Sterling, VA

Profile Summary

Senior delivery and program leader with 10+ years of experience spanning software development, business analysis, and program execution within complex federal and enterprise environments. Proven ability to lead large application portfolios, manage competing operational and modernization priorities, and align cross-functional technical teams and senior stakeholders to deliver results. Brings a strong technical foundation as a former software developer combined with program-level ownership, Agile delivery leadership, and stakeholder management. Experienced leading cloud modernization initiatives (Azure), operating in high-ambiguity environments, and driving execution across multiple timelines, teams, and federal partners. Currently operating at a program-delivery leadership level and seeking a formal Program or Technical Project Management role.

Professional Skills

- Program & Portfolio Management
- Agile / Scrum Delivery
- Requirements & Backlog Management
- Technical Project Management
- Stakeholder & Client Management
- Risk, Dependency & Issue Management
- Cloud Modernization (Azure)
- Cross-Functional Team Leadership
- Operational (O&M) & Helpdesk Oversight
- Delivery Metrics & Reporting

Technology

- JIRA, TFS, ServiceNow, Confluence
- Microsoft Office, Cloud Platforms: Azure, AWS
- Web & Development: JavaScript, Angular, React, Nunjucks, Java (basic)

Education

- Bachelor-level Coursework, Marymount University
- Project Management Professional (PMP) – Training completed, exam anticipated

Work Experience

Dev Technology Group

Senior Business Analyst / Scrum Master (Technical Program Delivery Lead) Jan 2020 – June 2026

- Lead delivery and operational oversight for a portfolio of 25 applications and databases supporting federal programs, balancing continuous O&M, helpdesk support, and modernization initiatives across multiple federal stakeholders.
- Serve as the primary delivery lead for a cloud modernization program migrating legacy systems to Microsoft Azure, coordinating execution across a team of engineers, internal project leadership, and client-side federal program management.

- Manage 25 parallel timelines and continuously shifting deliverables, adapting plans in real time to address production issues, evolving requirements, and competing stakeholder priorities while maintaining delivery momentum.
- Act as the central point of coordination between two federal Project Managers, internal leadership, engineering teams, and 20–30 application users and business stakeholders, ensuring alignment across technical execution, program objectives, and client expectations.
- Own end-to-end requirements definition, backlog prioritization, sprint planning, and delivery tracking, translating complex operational and business needs into actionable technical work.
- Facilitate all Agile ceremonies, proactively identifying risks, dependencies, and delivery blockers and driving resolution across cross-functional teams.
- Support program-level reporting, documentation, and financial tracking, providing regular status updates and executive-level insights into progress, risks, and resource needs.
- Leverage prior software development experience to partner closely with engineers, validate technical approaches, support testing efforts, and ensure high-quality, sustainable delivery outcomes.

Dev Technology Group

Applications Developer | March 2019 – Jan 2020

- Supported full-cycle application development, from requirements gathering and technical design through development, deployment, and post-release support.
- Collaborated directly with business stakeholders and technical teams to deliver solutions aligned with operational and user needs.

The Washington Post

Software Developer | Jan 2017 – Oct 2018

- Built and maintained internal and external applications in collaboration with editorial and business partners, supporting critical business operations and digital initiatives.

Clearly Innovative

Applications Developer | Dec 2015 – Jan 2017

- Delivered web and mobile solutions across multiple clients, owning requirements analysis, wireframes, user flows, development, and ongoing enhancements.

Clearly Innovative

Logistics Manager | April 2013 – Dec 2015

- Managed end-to-end operations for a STEM education program, including budgeting, vendor management, staffing, training, and day-to-day execution.

Clearly Innovative

Office Manager | Nov 2011 – Dec 2015

- Supported executive leadership across operations, HR, contracts, finance, and technical training while contributing to application development initiatives.
